

Primary sources of energy		Natural processes in energy conversion	Technological processes in energy conversion	Form of energy
SUN	Water	Evaporation, melting of ice and snow	Hydroelectric power station	Electric energy
	Wind	Movement in the atmosphere	Wind power plant	Thermal and electric energy
		Wave energy	Water-wave power station	Electric energy
	Solar radiation	Ocean currents	Power stations using the ocean currents	Electric energy
		Heating of the Earth surface and the atmosphere	Power stations using the ocean heat	Electric energy
			Heat pumps	Thermal energy
		Sunrays	Collectors and thermal solar power stations	Thermal energy
			Photoelements and solar power stations	Electric energy
			Photolysis	Fuels
	Biomass	Biomass production	Heating and thermal power stations	Thermal and electric energy
			Conversion devices	Fuels
EARTH	Isotope decay	Geothermal resources	Heating and geothermal power stations	Thermal and electric energy
MOON	Gravitation	Tide	Tidal power plants	Electric energy
